Welcome to the Vote2Wear Art Community!

Here is a step by step process to successfully submit your design to Vote2Wear in order to be one of our designers and to compete in our Awesome Daily Battles.

In order to submit a design click the SUBMIT A DESIGN button to the top right of the home page. Clicking this button will take you the Design Submission Page. Other pages on the site may have a SUBMIT A DESIGN button which will also take you to the Design Submission Page.

We like to make it easy for our designers to submit their creative work.

At the Design Submission Page there are a few options for submitting your design. Don't worry I'll be with you every step of the way.

Click the Browse button in order to upload the desired design from your computer or mobile device.

After uploading your design give it a name in the Name input field under the Browse button.
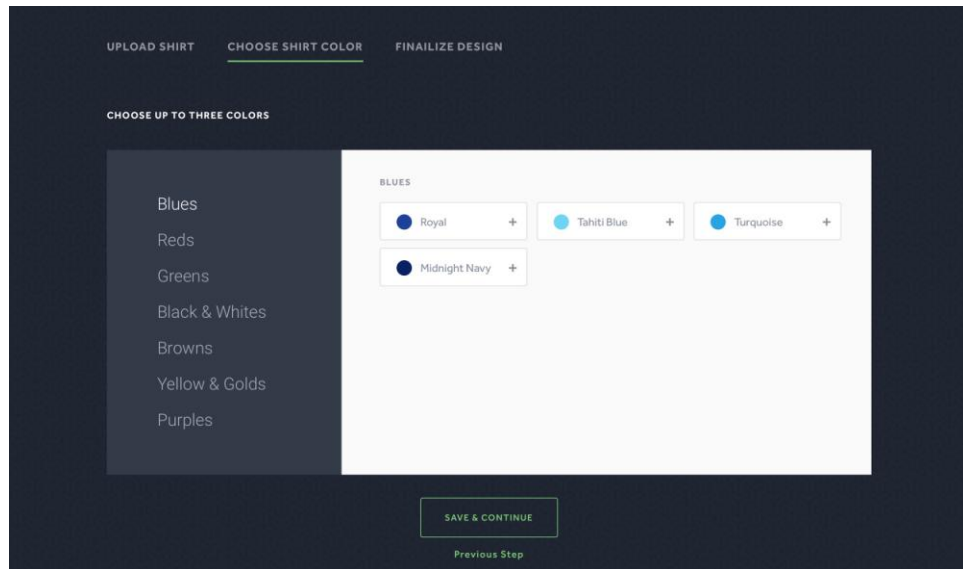

After you have named your design give it a short description in the Description input field. This could include your inspiration, ideas behind the design or any explanation you want to give about your design.

Following the Description input field is the Tag input field. In here add any tags you want to give your design. Your tags should be descriptions of your work made up of one to two words. Make sure each tag is separated by a coma. For example the tags for the Comma Chameleon Shirt are comma and chameleon. Other tags could be reptile, lizard, grammar, or green. Do you get where we are going with this?

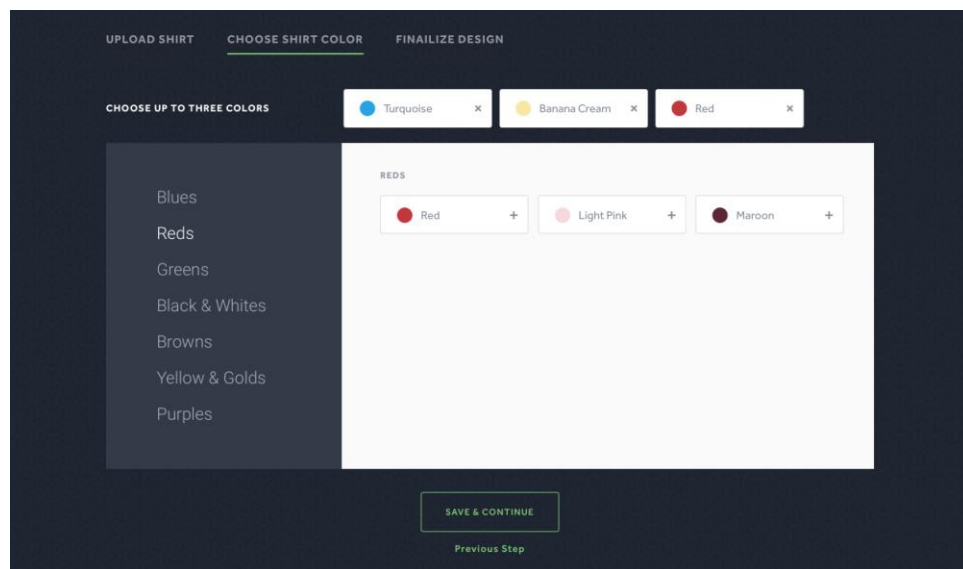

After all the input fields have been filled in and your design has been selected and uploaded, click the SAVE & CONTINUE button in order to save your work and continue to the next section.
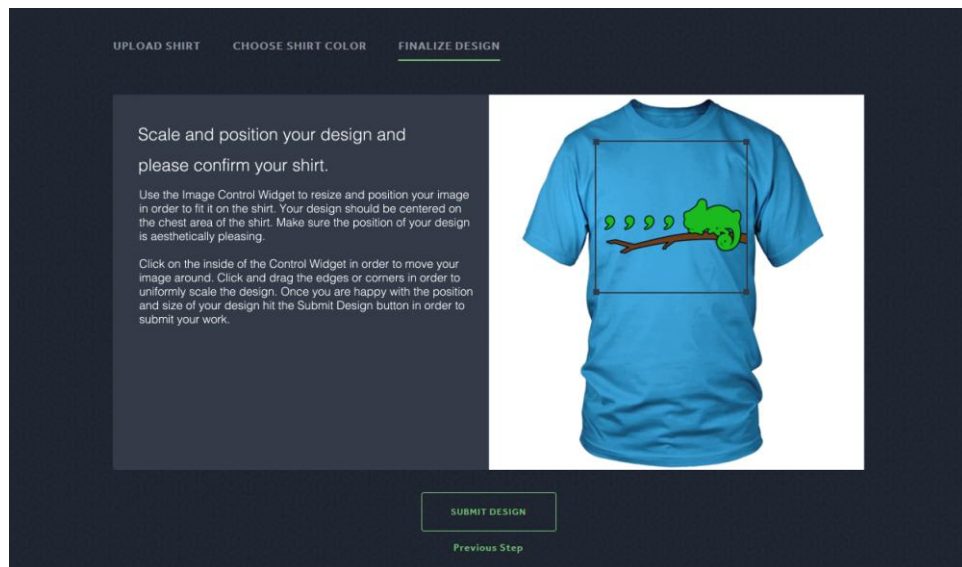

See that wasn't hard at all.

In this section your get to choose up to three colors for your shirt to be printed on from the Color Selection Window. To the left of the window on the grey background is the color categories and to the right on the white background are the colors you can choose.

Each category has a few color selections, you can mix and match your selections up to a maximum of three colors. The colors you select will be displayed to the top right of the page above the color selection window. Once your are happy with your selections click the SAVE & CONTINUE button to advance to the next section.
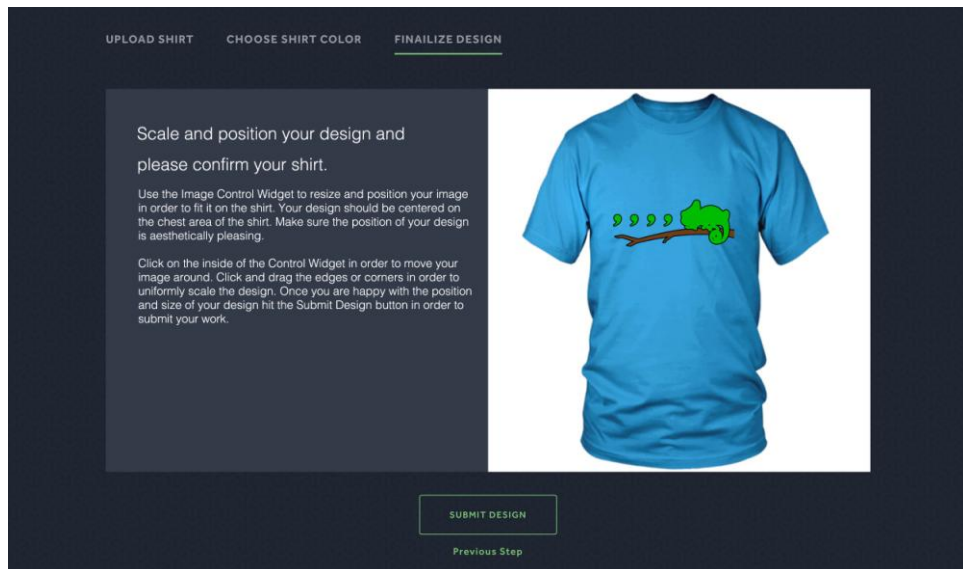

You are almost done submitting your work, just one more step!

Use the Image Control Widget in order to resize and position your image to fit it on the shirt template.

Click on the inside of the Control Widget in order to move your image around. Click and drag the edges or corners in order to uniformly scale the design. The design should not overlap the edges of the shirt template. If the design is outside of the shirt template edges then it will not look correctly on the site or when the shirt is printed.

Your design should be centered on the chest area of the shirt and it should look aesthetically pleasing. Once you are happy with the position and size of your design hit the SUBMIT DESIGN button in order to submit your work.

After the clicking the SUBMIT DESIGN button your design should be uploaded to the Vote2Wear site. You will see a message on screen acknowledging a successful submission.

All Done! You are now an Official Vote2Wear Designer, pat yourself on the back you deserve it.
